

More photos of sewing a flight bag

With contrasting pocket and bottom and a black webbing strap

After you turn the pocket, press it and stitch it closed where you turned it.

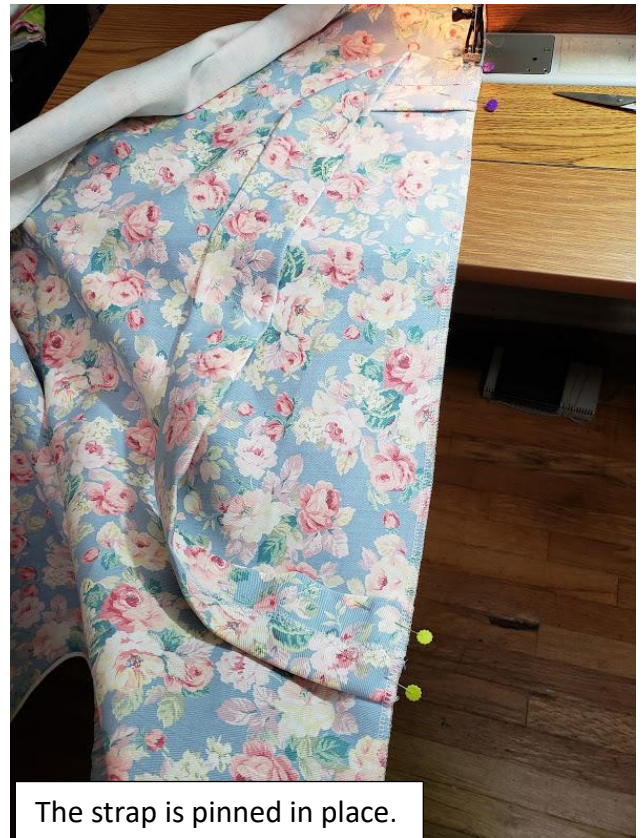

Line up the Velcro on the inside of the pocket with the Velcro on the bag.

Press the Velcro pieces together and stitch around the sides and bottom of the pocket.

When the pocket is stitched in place, you can't see the Velcro.

The strap is pinned in place.

Some tips:

Make a reusable cloth, pellon or heavy paper pattern of an 18 inch circle.

Wide fabric works best, but you can use 45 inch fabric if you want. You'll need 2 yards and 2 inches. Cut the pocket 13 x 22 inches.

Make sure you use sew-on Velcro. Not the sticky kind with adhesive. That will gum up your sewing machine needle.
